Did you know? The Lo Line trap has proven to be a valuable tool for Bedbugs. As outlined in a recent article from Bedbug Central "During field testing of the Lo Line, this interception device has shown to have the greatest recorded efficacy in capturing bedbugs than other similarly purposed glue boards".

In a newsletter published in April last year, Dr Bill Robinson from B&G outlines the benefits of the Lo Line trap. Contact your local Globe service centre for a copy of the newsletter or download from our website: www.globeaustralia.com.au
