## CARMEL CARRIER II

**Carmel Carrier II** is a specially formulated solution for use as a diluent and carrier in both Thermal Fogging Machines and Cold Aerosol Generators (ULV Aerosol Generators, Misting Applicators). Carmel Carrier II is suitable to replace petrochemical diluents in a wide range of applications including sensitive areas such as residential vector control. It is also suitable for mixing with water based products.

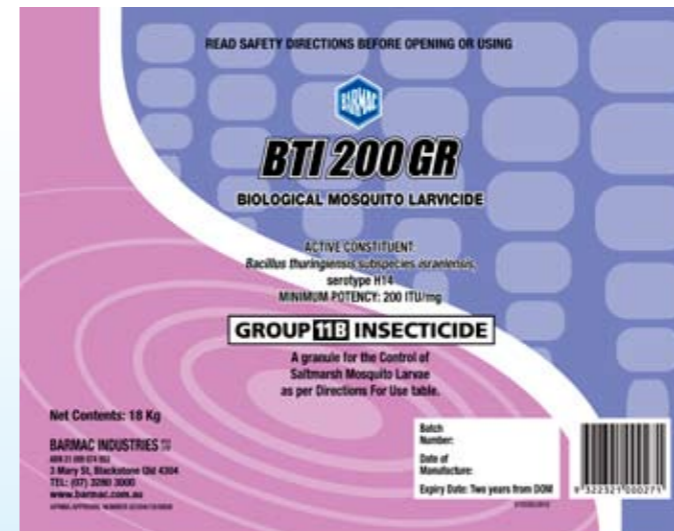

Pack size: 20L Drum

## BIFORCE 100SC

**Biforce 10SC** Termiticide and Insecticide is an aqueous suspension concentrate containing 100g/L Bifenthrin. It is suitable for use where knockdown and residual protection is required in a variety of situations including mosquito control in and around domestic, commercial and industrial buildings.

Pack size: 5L Bottle

## BARMAC BTI 200GR

**Barmac BTI 200GR** (Minimum potency: 200ITU/mg) is a granular formulation using corn cob grit as the carrier. It is effective against saltmarsh mosquitoes in areas such as salt marshes and tidal waters. All Barmac BTI formulations are produced in the United States to strict manufacturing specifications, ensuring that the products are of high quality and without any harmful contaminants.

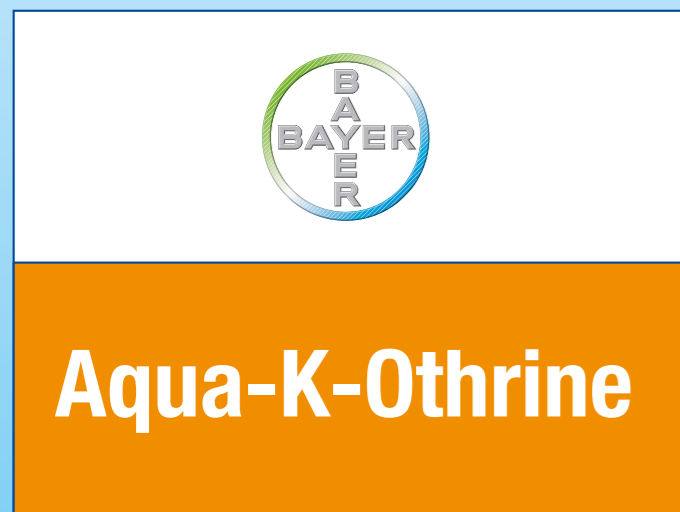

Pack size: 18Kg Bag

## BARMAC BTI 1200

**Barmac BTI 1200** is a microbial larvicide containing *Bacillus thuringiensis* subspecies *israelensis*, a naturally occurring soil bacterium that produces protein toxins (insecticidal crystal protein - ICP) and a spore. The insecticidal activity of **Barmac BTI 1200** and all BTI formulations is due to the presence of the protein toxins. The spore has no effect on the larvicide activity.

Pack sizes: 200L Drum & 10L Bottle

## AQUA-K-OTHRINE

**Aqua-K-Othrine** is a water-based space spray concentrate for use in the management of mosquitoes and flies. Contains Film Forming Aqueous Suspension Technology which allows dilution with water without reducing performance. Dilutes in water for both ULV and thermal fog applications. **Aqua-K-Othrine** is fully approved under the WHO Pesticide Evaluation Scheme for use as a space spray.

Pack size: 1L Bottle

## PERIGEN

**Perigen** (500g/L Permethrin 25:75) has provided professional pest managers with many years of outstanding results in even the most difficult of circumstances. Perigen is a product that can be used for the impregnation of military uniforms, fabrics and bed nets to repel mosquitoes and other biting flies.

Pack size: 1L Bottle

## BIOPREN® 4GR

**Biopren® 4GR** 4g/kg (S)-Methoprene sand granule has been developed for aerial and land based applications at 3-5kg/Ha. With excellent canopy and vegetation penetration, small granules provide multiple point sources for (S)-Methoprene release over the target area. **Biopren® 4GR** has superior storage characteristics: 2 years at or above 25°C.

Pack size: 20Kg Bucket

## BIOPREN® 50 LIQUID

**Biopren® 50 Liquid** 50g/L (S)-Methoprene mosquito larvicide has been developed for aerial or land based applications at 220-360mL/Ha. The concentrated active ingredient provides a cost effective treatment for large areas. **Biopren® 50 Liquid** has superior storage characteristics: 2 years at or above 25°C.

Pack size: 5L Bottle
